

HEI4Future

Entrepreneurial and innovation skills
for developing the new value chains of
mobility, health and manufacturing

Supported by

Funded by the
European Union

Hackathon4Future

Supporting students and start-up teams to solve the most pressing challenges in the fields of urban mobility, health and manufacturing.

What to expect

- ✓ We will guide you through the theoretical background under the supervision of experts.
- ✓ We will introduce you to the challenge and problem being addressed.
- ✓ We will give you space to brainstorm solutions.
- ✓ Mentoring will be provided during the event on formulation of project presentation and presentation skills to support your pitch preparation.

The best teams will be selected for a full-fledged business mentoring program starting in fall 2023 to support you in designing and launching your start-up.
