

## SYNERGIES BETWEEN FP7 AND STRUCTURAL FUNDS FOR RESEARCH INFRASTRUCTURES

### Research Infrastructures in FP7 (2007-2013)

The overall objectives of the **FP7 Research Infrastructures (RIs) programme (1.7 B€)**, are:

- To optimise the use and development of the best RIs existing in Europe,
- To help create in all fields of science and technology new RIs of pan-European interest
- To maintain European RIs at the forefront of the advancement of research, and able to help industry to strengthen its base of knowledge and its technological know how
- RIs are facilities, resources, and related services used by the scientific community for conducting basic and applied research in the whole range of S&T fields. This includes:
  - major scientific equipment (e.g. synchrotrons, telescopes, research vessels)
  - scientific collections, archives and structured information
  - ICT-based e-infrastructures (grids, communication networks)
- RIs can be single-sited, or distributed (network of distributed centres).

### The Cohesion Policy and Research (including Research Infrastructures) 2007-2013

- Reducing regional disparities
- Promoting competitiveness, growth and employment
- Addressing sustainability issues
- 2 Structural Funds (SFs):
  - **ERDF**: European Regional Development Fund (DG REGIO)
  - **ESF**: European Social Fund (e.g. for human capital) (DG EMPL)
- Research Technological Development and Innovation (RTD-I) is crucial to regions' economic performance.

**"Research and development Infrastructures and centres of competence in a specific technology" (Code 02): 9.74 B€ (i.e. 11.4% of total RTD-I), allocated to Research Infrastructures (RIs) Exclusively from DG REGIO, broken down:**

- **75.8%**, in favour of **Convergence regions (7.47 B€)**
- **22.9%**, in favour of **Competitiveness and Employment regions (2.25 B€)**
- **1.3%** for exploiting RIs across borders, i.e. **European Territorial Cooperation (ETC, 128 M€)**

**"Developing human potential in the field of research and innovation, in particular through post-graduate studies ..." (Code 74): 4.93 B€, (i.e. about 5.77% of the total RTD-I), consisting of:**

- **4.36 B€** (21% of total-DG EMPL-ESF) and
- **572 M€** (0.88% of total-DG REGIO-ERDF)
- **Mainly 'Convergence', less 'Competitiveness & Employment', few 'European Territorial Cooperation'.**

## **"Mapping" of the 34 1<sup>st</sup> European Strategy Forum for Research Infrastructures (ESFRI)**

**Roadmap:** identification, on a project by project basis, of individual participants eligible to apply for SFs:

- **Convergence funds (Code 02):** 66 different participating organisations, in 29 cities/regions, in 16 MS, involved in 25 of 34 projects,
- **Competitive and Employment funds (Code 02):** 260 different participating organisations, in 128 cities/regions, in 17 MS involved in all 34 projects,
- **ETC funds (Code 02):** 131 different participating organisations, in 59 cities/regions, in 19 MS involved, in 27/34 1<sup>st</sup> ESFRI Roadmap projects, are potentially eligible to receive.

### **Follow up**

- **Extreme Light Source (ELI) Preparatory Phase project:** a meeting between National Authorities (CZ-HU-RO) and DG RTD-REGIO representatives was held in December 2009; to date: the three pillars (**Prague CZ- Szeged HU – Magurele RO**) have confirmed their commitment; CZ has already submitted their proposal to DG REGIO on 30/06/2010; Romania will be ready for submission to DG REGIO before the end of this year; HU, is expected to submit their proposal by March 2011
- **Four additional Preparatory Phase projects, i.e.: BBMRI (ES), LIFEWATCH (HU), Neutron ESS (ES), SPIRAL2 (HU),** are in the process of being thoroughly scrutinised, upon request of the respective national managing authorities in brackets
- A **"Template" document**, for information on an **existing and/or a new RI applying for Structural Funds Support**, has been jointly developed by DG RTD and REGIO; the aim is to assess the feasibility (or not) of Structural Funds support to a given Research Infrastructure; this is expected to catalyze and facilitate the relevant interactions between stakeholders concerned (RI owners/managers and National-regional Managing Authorities).

### **Additional Actions**

**A) For ESFRI projects having their construction/implementation between now and 2012**, applicability of possible funding for the period 2007-2013 needs to be verified with DG REGIO in the frame of SF:

- The content of the respective National or Regional Sectoral Operational Programs, which may (or not) require modifications
- Explore interest of Managing Authorities to use such Funds for these projects or relevant ideas stemming from such projects; in doing so, it is critical to explore and assess, the impact of such Research Infrastructure facilities on the economy of the region, in particular in terms of creation and development of innovative businesses (including spin-offs, start-ups, etc).

**B) For those ESFRI projects for which the implementation phase is anticipated after 2013**, it is useful to stimulate the Managing Authorities to explore the possibility to include them in the future National or Regional Sectoral Operational Programs.

**C) All relevant data needed for the use of SFs for the development of Research Infrastructures or their Regional Partner Facilities (RPFs)**, are being communicated to all stakeholders:

Research Infrastructures Project Coordinators, participants, owners, managers; National/Regional public authorities; ESFRI representatives; Research Infrastructures Programme Committee members; National Contact Points; Committee of Regions; European Parliament.
