- Target ~50% Industry
- Full value chain and full product life cycle coverage
- Cross-fertilization
- World class shared facilities
- Extended network of facilitators
- Industry-driven Education
- Partners with global reach

EIT Manufacturing

EIT Manufacturing is supported by the EIT, a body of the European Union

The EIT Manufacturing – BoostUp! Competition

We are challenging European Start-Ups, Ventures and Entrepreneurs to find and scale up the best solutions for sustainable, resilient, and socially impacting Manufacturing.

BoostUp! is a European Business Competition for entrepreneurs, start-ups, scale-ups and SMEs in the manufacturing sector. Participants compete for packages of support services and for cash prizes at a regional level and then in a Grand Final.

The BoostUp! competition is open to outstanding ventures under three categories:

- **CREATE:** for entrepreneurs with a novel business that addresses critical manufacturing pain points.
 - **ACCELERATE:** for start-ups ready to scale up their business
 - **TRANSFORM:** for SMEs with an idea to take their venture to the next level
- Time has never been more right for manufacturing innovation, as Europe's industry has a key role in accelerating the recovery from the pandemic crisis & paving the way for a green & climate neutral Europe.
