European Week of  
Regions and Cities

Brussels 6-9 October 2008

## WORKSHOP 09A37

9 October 2008 – 9h00-10h45

### *REGIONS OF KNOWLEDGE: synergies in EU funding opportunities for research, development & innovation*

Regions of Knowledge is an FP7 initiative to help turn Europe into a dynamic and competitive knowledge-based economy.

Examples will be presented to discuss how research-driven clusters following the 'triple helix' model can help design a research-based strategy for economic development and deliver growth and competitiveness in the regions.

Special attention will be given to synergies between the EU's research, innovation and cohesion policies for 2007-2013.
